NAAC Accredited 'A' & Certified ISO 9001 : 2015 & ISO 14001 : 2015

### **Steps Taken to Implement and Assess Dental Graduate Attributes:**

The following are the steps taken by the college to attain and evaluate attributes of dental graduates.

Academic schedules provided ensure a higher level of learning outcomes. Development of skills in clinical portion of the curriculum is fulfilled through respective clinical postings. During the postings demonstrations are given for each procedure and cases discussed appropriately. Each student has a respective quota of clinical cases to be performed each year. Individual clinical evaluation is carried out at the end of the postings. Formative and summative evaluations are done.

Student passing out from this prestigious college acquire adequate knowledge, necessary skills and attitudes which are required for carrying out all the activities appropriate for general dental practice involving the prevention, diagnosis and treatment of anomalies and diseases of the teeth, mouth, jaws and associated oral structures. This is taken care of by attending preclinical work and clinical postings in all wings of dental departments. Log books are maintained and the students are trained for the viva verse on the subject in order to facilitate the deep understanding. Students also learn the concept of community oral health education and become suitable to participate in the rural health care delivery programs.
