- All these cells, except Merkel cells, lack desmosomal attachments to adjacent cells (hence during histologic processing the cytoplasm shrinks around the nucleus to produce the clear halo)
 None of these cells contains tonofilaments and
- They also don't participates in the process of maturation seen in oral epithelia

Melanocytes

desmosomes seen in epithelial keratinocytes

PARENTS TEACHERS MEETING

In the month of April, ACDS has conducted Parents-Teachers Meeting. Through Online platform teachers interacted with students and to their parents.
